COMMONWEALTH BUREAU OF CENSUS AND STATISTICS

MONTHLY BULLETIN OF EMPLOYMENT STATISTICS (Wage & Salary Earners in Civil Employment)

APRIL, 1945.

Issued for General Information.

MORNING PAPERS : THURSDAY, 12th JULY, 1945. EVENING PAPERS : THURSDAY, 12th JULY, 1945.

PART I.

TOTAL PERSONS OCCUPIED, JULY 1939, JUNE 1943 AND MARCH 1944.

Previous issues of this Bulletin contained comparisons of total numbers of breadwinners distinguishing sexes and grades in July 1939, June 1943 and March 1944.

PART II.

SECTION A: TOTAL WAGE AND SALARY EARNERS IN CIVIL EMPLOYMENT.

Total wage and salary earners working in all industries (including rural and private domestic employment) are shown at intervals in the table below.

AUSTRALIA : WAGE AND SALARY EARNERS IN CIVIL EMPLOYMENT. (Thousands)

(a) Excluding unpaid helpers. (b) Not available

Data as to employment in rural industry is obtainable only annually in March and for private domestic service only at a Census or quasi-Census. The balance of this Bulletin deals with monthly figures of wage and salary earners in employment, exclusive of rural and private domestic. The figures in all cases relate to wage and salary earners in civil employment only and exclude persons engaged as employers or on their own account or serving full time in the Army, Navy and Air Force (including Perma-(nent Forces).

SECTION B: WAGE AND SALARY EARNERS IN EMPLOYMENT (EXCLUDING RURAL INDUSTRY AND PRIVATE DOMESTIC SERVICE).

Monthly estimates of the number of wage and salary carners in civil employment (excluding rural workers and female domestics in private homes) are made through the use of Pay-Roll Tax statistics and direct returns of Commonwealth Government employment.

The trend of employment since the oubtreak of war is shown in the table

bolow:-

(a) Includes all direct Government employment, viz., civilian employees of Commonwealth Government factories, civil and war departments and construction authorities, and of State, Semi-Government, Local Government and Allied Government Authorities.

Over the war period from July 1939 to its peak in August, 1943, Government employment rose from 405,000 to 546,900, an increase of 141,900 persons. Of this increase 62,700 were males, 79,200 were females. Of the male increase 45,200 were in Government factories, 26,600 were employed by Governmental bodies on Allied Works Council projects and 37,000 were the increase in Defence Departments and special war-time departments including U. S. A. authorities. The decrease over this period in number of males employed by other departments and Local Authorities was 46,100. The increase of 79,200 in females up to this peak period of August, 1943, was distributed as follows: Factories, 25,700; War Departments and U. S. A. Authorities, 30,000; Other Commenwealth, State and Local Authorities, 23,500. From its peak of 546,900 in August 1943, the number of persons in Government employment fell to 519,900 by April 1945 or by 27,000. This decrease comprised 14,200 males and 12,800 females:

Total wage and salary earnors in civil employment, Government and private, (excluding rural and household demestic) reached a peak in November 1941 (1,952,300) following which there was a heavy decline in male employment as men were called up for the Armed Forces. From August 1943 to April 1945 there has been an increase of 33,200 in the number of wage and salary earnors in private employment (excluding rural and private demestic).

The decrease since August, 1943 of 27,000 persons in Government employment and the increase of 33,200 persons in private employment (other than rural and private domestic) result in a not increase of 6,200 in total wage carners in all employment (other than rural and private domestic). The respective totals of wage carners (other than rural and private domestic) were 1,905,400 in August, 1943 and 1,911,600 in April, 1945. These figures relate only to certain wage carners and do not reflect the full effect of the policy of restoring service personnel to industry which was applied as from about August 1943. From August 1943 to April 1945 the decrease in not enlistments in the fores (excess of discharges over enlistments) was approximately 66,600 males and 2,100 females. Data as to the net increase in rural employment during 1944-45 will be known within a few weeks from the annual returns of farmers and data as to the change in number in private domestic employment and in number of employers and persons working on their own account will be known about the end of 1945 when the results of the Occupation Survey of June 1945 become available. This Survey may also reveal that the total males in private employment and in all employment shown above subsequent to June 1943 exclude some employees engaged on smaller buildings (houses etc.)

The docrease from March, 1945 to April 1945 in numbers of wage earners employed, was due to transient seasonal causes and an industrial stoppage.

SECTION C : INDUSTRIAL GROUPS

The following statement shows for certain months the estimated total numbers of wage earners in civil employment in the main industrial groups:

AUSTRALIA: WAGE AND SALARY EARNERS IN CIVIL EMPLOYMENT - INDUSTRIAL GROUPS (Excluding Rural Wage Earners and Domestic Workers in Private Homes)

TOTAL PERSONS (d)	1,952.3	1,904.3	1,905.4	7,919.9	7,071.00	1 200000

NOTES:

(a) Includes Government establishments, annexes and certain private firms engaged exclusively on munitions, aircraft and shipbuilding, but excludes private factories engaged partly on war contracts and partly on other work.

(b) Includes employees whose work is not related to a specific industry.

(c) Includes Building and Works Construction (other than Allied Works projects), Education, Health, Professional, Hotels, etc. and for females also Mining, Building, Forestry, etc., which are shown separately for males and persons.

(d) Total males and total persons shown above for 1944 and 1945 may exclude some employees engaged on smaller buildings (houses etc.) and in alterations and repairs to build-

ings.

In August, 1943 (by which date the munitions programme had passed its peak) employment in Governmental and quasi Governmental munition factories was 88,400 males and 38,200 females. By April, 1945 these numbers had fallen to 62,900 males and 18,200 females - decreases of 25,500 males and 20,000 females. There was also a decrease of 21,800 males employed on defence building and construction, due to completion of some defence projects. The principal industries showing increases in estimated employment of male wage earnors (other than rural) were 13,800 in factories and works (other than Governmental munitions); 4,600 in shipping and stevedering; 5,800 in rail and air

trasport; 4,100 in other transport and communication; 5,000 in retail trade; 5,500 in other erce including wholesale trade; and 16,400 in other employments. The total number of female wage earners employed (other than in rural industry or private domestic service) showed a slight decrease from 635,700 in August, 1943 to 634,000 in April, 1945. The numbers of women wage earners in individual industries listed above, apart from governmental munitions did not change appreciably but there was an increase of 15,300 (from 162,600 to 177,900) in a miscellaneous group of servicing and professional occupations - exclusive of private domestic service, data for which will be derived from the Occupation Survey of June, 1945.

The movement of employment in the industrial groups from March to April, 1945, 'is summarised as follows:-

In respect of males the main decreases were: Munitions etc. -2,200; Wholesale Trade -1,100; "Other" Industries -500. Increases were: Other Factories +1,100; Rail and Air Transport +800; Defence Works Construction +200.

In respect of females there were decreases in Governmental n.e.i. -600; Munitions etc. -600; Other Factories -2,900 (seasonal movement) and Wholesale Trade -500. Female employment in Retail Trade increased +300.

SECTION E : STATES - INDUSTRIAL GROUPS

During April, 1945, total wago and salary earners in employment (excluding rural industry and household demostic) decreased in all States except Tasmania (no change).

MALES: Total male wago and salary earners omployed in non-rural industry decreased in all States except New South Wales (increase).

FEMALES: Total female wage and salary earners employed (other than in rural industry or private domestic service) decreased in all States except South Australia and Tasmania.

The following summary statement indicates how total employment in the various industries moved during April, 1945:-

Industry	Increase	Docrease

ee Notes (a), (b), (c) and (d) to the table on page 3; (e) Comparable figures for March, 1945, were published in Employment Bulletin No. 41.

The above statistics relating to total employment are based on data from various sources, including Pay-Roll Tax returns and returns of Commonwealth Government employment.

PAY-ROLL TAX RETURNS

Figures of employment recorded on Pay-Roll Tax returns for Australia are given without any adjustment in the next table. The returns do not cover employees of the Commonwealth Government; employers who pay not more than £20 per week in wages do not make returns and religious and public benevolent institutions and hospitals are also exempt. The proportion of all employees who are included varies from State to State, but in general the proportion of employees (other than those of the Commonwealth, those engaged in rural industries and female domestics in private households) in the Pay-Roll Tax returns is about 90 per cent. of the estimated total of males in employment and about 80 per cent. of the females.

Employers were classified for "industry" according to the industry in which they were prodominantly engaged. The following table may be taken as indicating trends from menth to menth, but not as a guide to the absolute numbers employed in the respective industries.

PAY-ROLL TAX STATISTICS : AUSTRALIA

Number of employees stated to be on last pay-roll in the month of all employers making Pay-Roll Tax Returns.(a)
